

ALL BUSINESSES FACE THREATS. EVERY BUSINESS DESERVES TO BE SECURE.

1. Does your company use email to communicate with business partners?
2. Does your company send or receive invoices electronically?
3. Are you looking to enter or expand your presence as a supplier in the aerospace/defense market?
4. Does your company store information digitally that is proprietary (e.g., personnel files, contracts, pricing lists, customer design specs)?

Cybersecurity Resiliency and Awareness

Register now for this 2-day, DoD funded, cybersecurity workshop offered by Manufacturing Works. This workshop will address these questions and offer practical approaches for meeting requirements through four different modules. Registration is required, and the workshop will take a hybrid approach with both in-person and virtual offerings, although we recommend being in attendance if possible. Topics included:

- Using Cybersecurity as a Component of Business Resiliency
- Contractual Reference Frameworks Relevant to Controlled Industries (e.g., defense, aerospace, automotive)
- Risk Control and Mitigation for Real Companies
- Building a Cybersecurity Resilient Environment

Sec-UR-ity. You are at the center.

WHEN

June 22, 2021 | 1:00-5:00PM
June 23, 2021 | 8:00-12:00PM

WHERE

1400 E College Dr, Cheyenne, WY 82007
